# 1. Creating your library

## Add PDFs to Mendeley

You can add PDFs to Mendeley by clicking the **Add Document** button on the far left of the toolbar. Alternatively, you can **drag and drop** PDFs into the content pane. Mendeley will then attempt to detect the document details (bibliographic data).

Any documents whose details Mendeley is uncertain about will be added to the **Needs Review** collection for manual verification. You may use Mendeley's [Document details lookup](#) (CrossRef, PubMed, and ArXiv) or [Google Scholar Search](#) to complete missing document details (see below).

## Import/export EndNote™, BibTeX and RIS libraries

Switching from other reference management software such as EndNote™ to Mendeley is simple. As EndNote™ uses their own proprietary file extension (.enl) you will need to export your library as .xml file (the more open common standard) in order to migrate to Mendeley:

### In EndNote™:

1. Select File ➡ Export
2. Choose “XML” type and “RIS” as output style
3. Give your library a name and save it on your PC

### Then in Mendeley:

1. Select File ➡ Add Files
2. Choose the XML file that you have previously exported from EndNote™ and click on “Open”
3. Your EndNote™ library will appear in Mendeley Desktop

To **import** BibTeX and RIS XML alongside PDFs choose:

File ➡ Add Files

Likewise your data can easily be **exported** from Mendeley:

1. Select the documents you would like to export and go to File ➡ Export or press Ctrl + E or Cmd + E on MacOS.
2. You will then be given the option to save your files in the most common formats - .xml, .ris, and BibTeX files.

## Document details lookup (CrossRef, PubMed, and ArXiv)

You can also lookup document details from CrossRef (DOI), PubMed (PMID), and ArXiv. Just fill in the document ID in the respective field and click the magnifying glass icon next to it to get the details for those documents. These fields are located in the **Details** tab.

Details Notes

These details need reviewing. You can mark them as correct, or search by title on Google Scholar.

Details are Correct Search by Title

Type: Journal Article

**Creation of a Bacterial Cell Controlled by a Chemically Synthesized Genome**

Authors

Publication

Year:

Issue:

Pages:

**Abstract**

**Tags**

**Author Supplied Keywords**

**URLs**  
Add URL...

**Catalog IDs**  
ArXiv:  
DOI: 10.1126/science.1190719  
PMID:

## Google Scholar Search

You can lookup document details with Google Scholar in Mendeley:

1. **Input the correct document title**
2. **Click search**

Mendeley will try to complete the missing data from Google Scholar. (Note: The lookup works only for imported PDF files and not for manually added entries.)

Details Notes

These details need reviewing. You can mark them as correct, or search by title on Google Scholar.

Details are Correct Search by Title

## One-click Web Importer

You can import references with a single click from the services listed below. To install the **Web Importer** and to find out how to use it, just select:

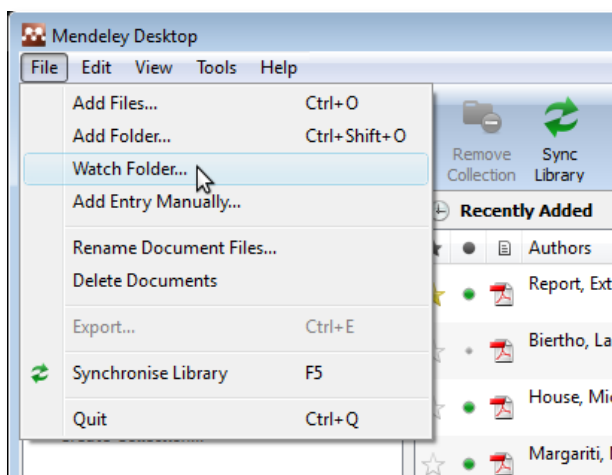

- ACM Portal
- ACS Publications
- AIP Scitation
- Amazon
- APS
- APA PsycNET
- arXiv
- BioMedCentral
- BioOne
- CiteseerX
- CiteULike
- Copac
- DBLP
- EBSCO
- GBV
- Google BookSearch
- Google Scholar
- IACR ePrints
- IEEE Xplore
- Informaworld
- IngentaConnect
- INIST/CNRSI
- Institute of Physics
- ISI Web of Knowledge
- JSTOR
- Lancet Journals
- MyOpenArchive
- NASA ADS
- Nature
- OpticsInfoBase
- PLoS
- PNAS
- PubMed
- RePEc
- SAGE
- ScienceDirect
- ScienceMag
- Scirus
- Spires
- SpringerLink
- SSRN
- Wikipedia
- Wiley InterScience
- WorldCat
- Zetoc

... and growing.

## Watch folders to automatically add PDFs to Mendeley Desktop

When you place a document in a watched folder, it will be automatically added to Mendeley so you can annotate, cite, and browse its references instantly. Adding files to Mendeley using watched folders makes it easier to add multiple papers in one go and keep them where you want on your computer.

## Synchronize PDFs with your Mendeley Web account

If you want to have access to your PDFs from anywhere, activate the file synchronization feature. By enabling this feature you are able to access your PDF files in your Mendeley Web library.

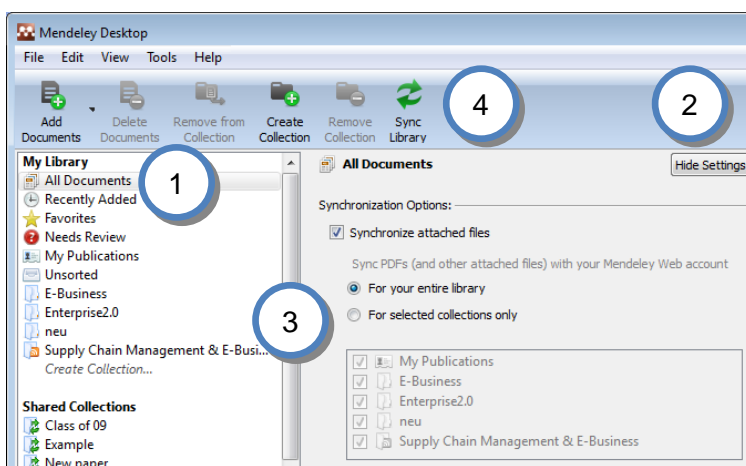

1. Make sure that “All Documents” in the “My Library” pane is selected

2. Select “Edit Settings”

3. Adjust the settings to your needs.

4. **Synchronize** your library

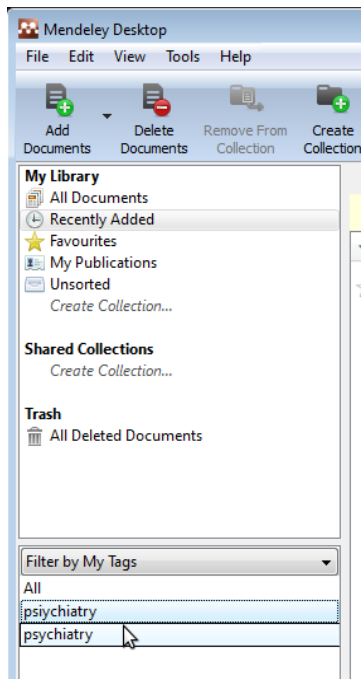

5. Login to your Mendeley Web account and see the result in your library

*Note: In the free account you may upload up to 500 MB of PDF files to your Mendeley Web library (Private Web Space). For more web space, please upgrade your account on <http://www.mendeley.com/upgrade>.*

## 2. Managing your documents and references

### Merge duplicate author names, tags, or publications

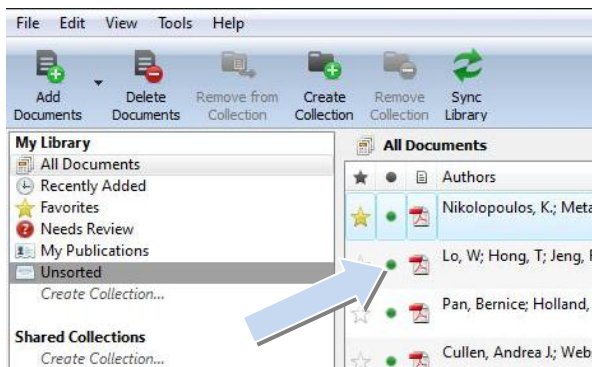

In the filter by authors/tags/publications pane, click a name you recognize has been duplicated or is incorrect, and **drag & drop** it onto the correct one to rename it.

*E.g. if I have two documents tagged “psychiatry” and “psychiatry”, dragging the latter one onto the former will rename the incorrect entry.*

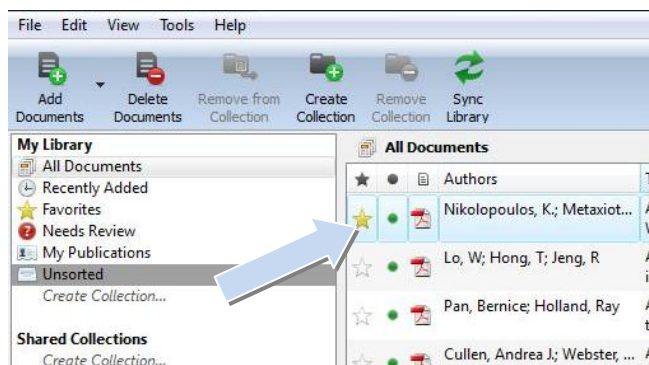

### Documents can be marked read/unread

Keep track of your unread papers. When you add documents to Mendeley, they are marked unread by a small green dot. If you open them within the Mendeley PDF viewer they will be marked read. Or simply click on the green dot to toggle read/unread.

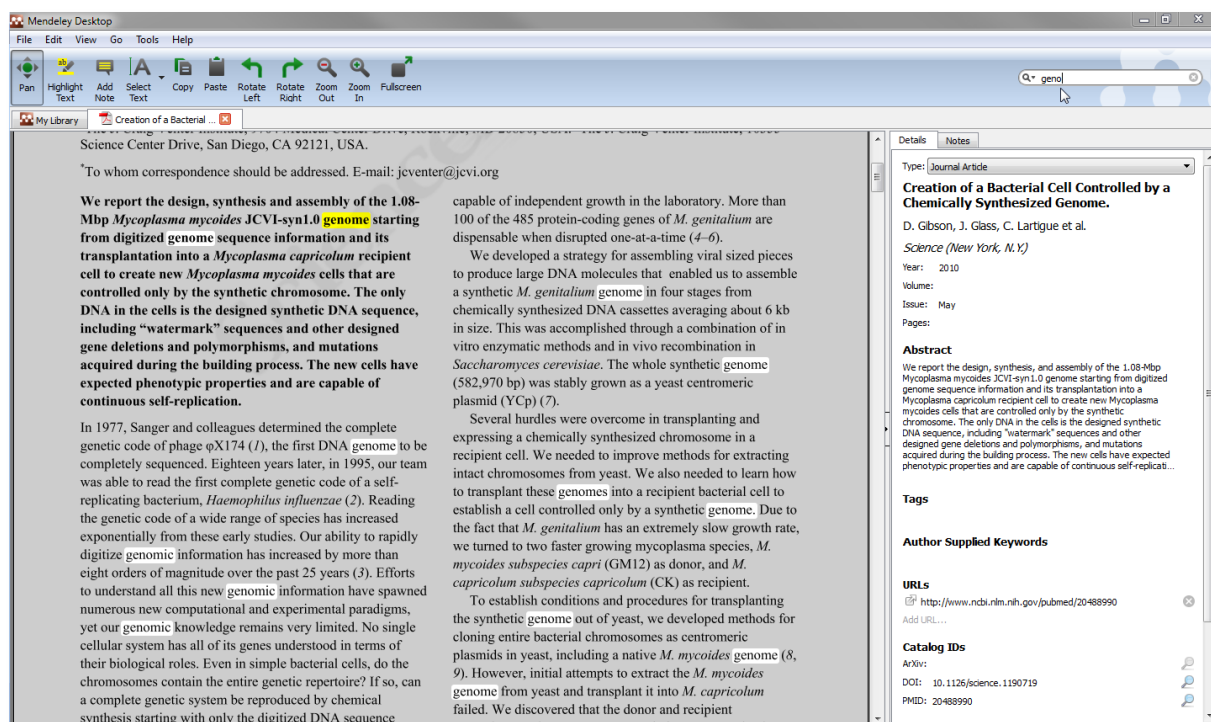

### Favorites

You can mark your favorite documents (or documents you keep want to track of) with the star icon. Simply click to star, and click again to un-star. All favorite documents will appear in the **Favorites** collection, so you can refer back to them with one click.

## Search as you type

Smart search in documents highlights the search term as you type, so you can find what you're looking for quickly. Just type into the search bar and watch Mendeley find matching terms in the document.

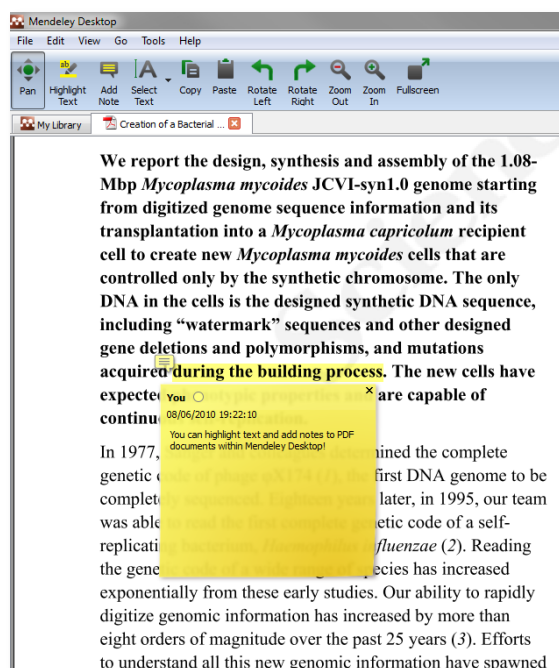

## Annotate PDFs

You can add highlights and notes to documents within Mendeley Desktop.

1. Open a PDF in Mendeley's PDF viewer by double clicking on it in the central pane,
2. Add highlights and notes by clicking on the **Highlight Text** or **Add Note** buttons on the menu.

You can share these annotations with your co-workers. To do so

1. Open a PDF that is part of a Shared Collection (see below),
2. Make your annotations,
3. Sync these annotations to Mendeley Web by going back to "My Library" and clicking on "Sync Library".

*Note: These annotations are not stored in the actual PDF-file, but rather in your Mendeley account. To create a new PDF file that contains all annotations, you can export the PDF with all its annotations by choosing: File → Export with Annotations from within the Mendeley PDF viewer.*

## Multiple level undo in document details

You can undo recent changes to your document details or annotations by clicking **Undo** in the usual place. Select the following option in the drop down menu:

Edit → Undo  
or Ctrl+Z (Cmd+Z for Mac)

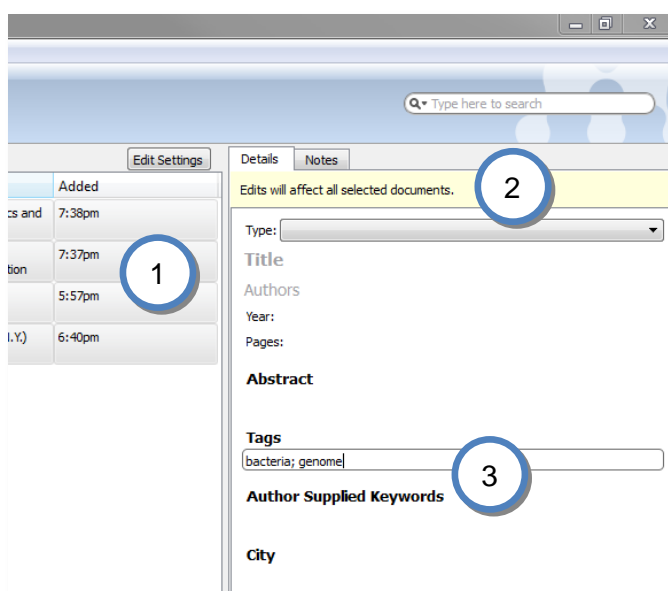

## Tag and edit multiple documents at once

When you want to tag or add details for more than one document in one go:

3. **Select the documents** you want to edit at once by pressing Ctrl + left clicking the documents you want to select
4. **Notice the batch editing confirmation message**
5. **Input your data**

The data can be tags, notes, or other document details such as the publication name.

*E.g., in this example the entered tags will be applied to all selected documents.*

## File Organizer

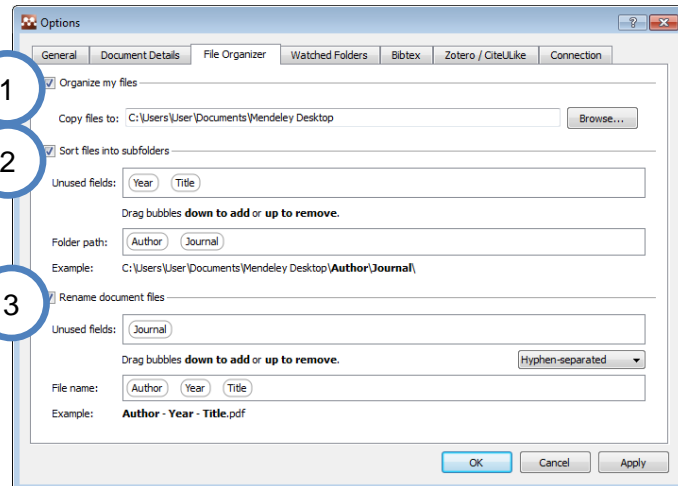

Mendeley's file organizer can automatically rename your PDFs and file them in a clear folder structure, making it easier to find your files outside of Mendeley. You can find it here:

Tools ➡ Options File ➡ Organizer tab

or for Mac choose: Mendeley ➡ Preferences ➡ File Organizer tab

In the tab, select:

1. **Organize my files:** to make a copy of all documents added to Mendeley within one folder
2. **Sort files into subfolders:** to create a folder structure based on selected document details
3. **Rename document files:** to rename the often non-descriptive names of your PDFs to file names that are more meaningful, including the author, journal, year, and title

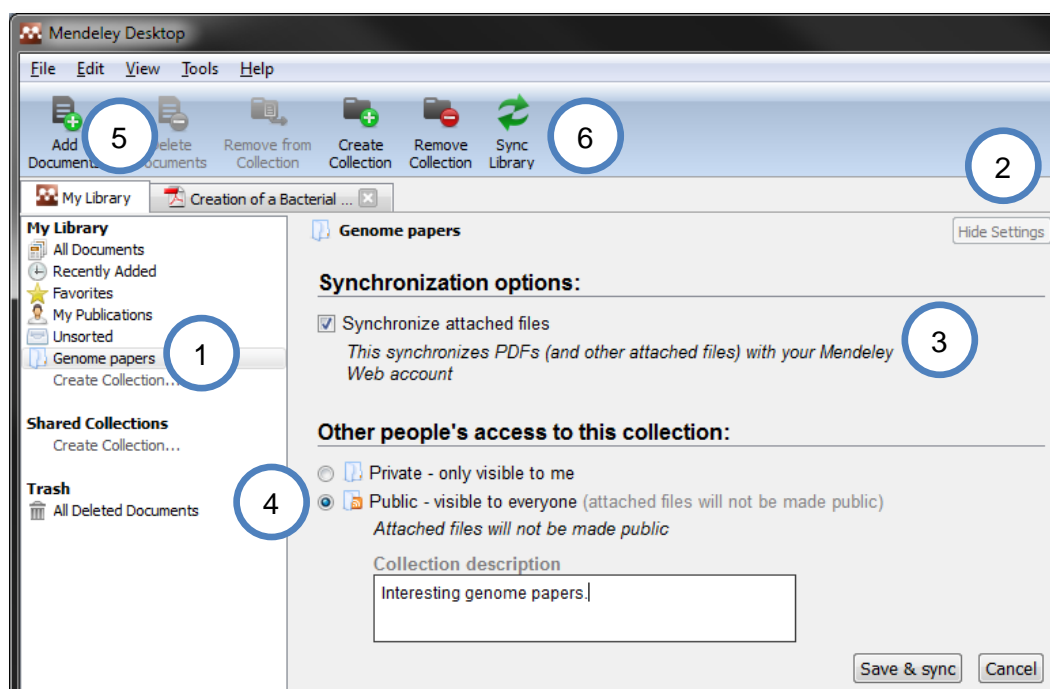

### 3. Sharing and citing references

#### Public Collections (reading lists)

Public Collections allow you to publish a reading list of references. The Public Collection behaves like a feed, so you can share a list of documents with subscribed users over the web:

1. **Create Collection** and type the name
2. **Edit Settings** (next to collection name)
3. (optional) Tick **Synchronize attached files** if you want to synchronize your PDFs, so that you can have access to these files privately on Mendeley Web (Note: they will not be made publicly accessible)
4. **Set collection as public** so users can see the Public Collection on your profile on Mendeley Web.
5. **Add Documents** to collection to publish them on Mendeley Web
6. **Sync Library** to make your collection visible on the web. Mendeley will then generate a Web link for the Public Collection which you can share with others.
7. (optional) Other users can subscribe to a RSS feed of your Public Collection when visiting the generated Web link. Additionally your Public Collection can be embedded on other Web pages.

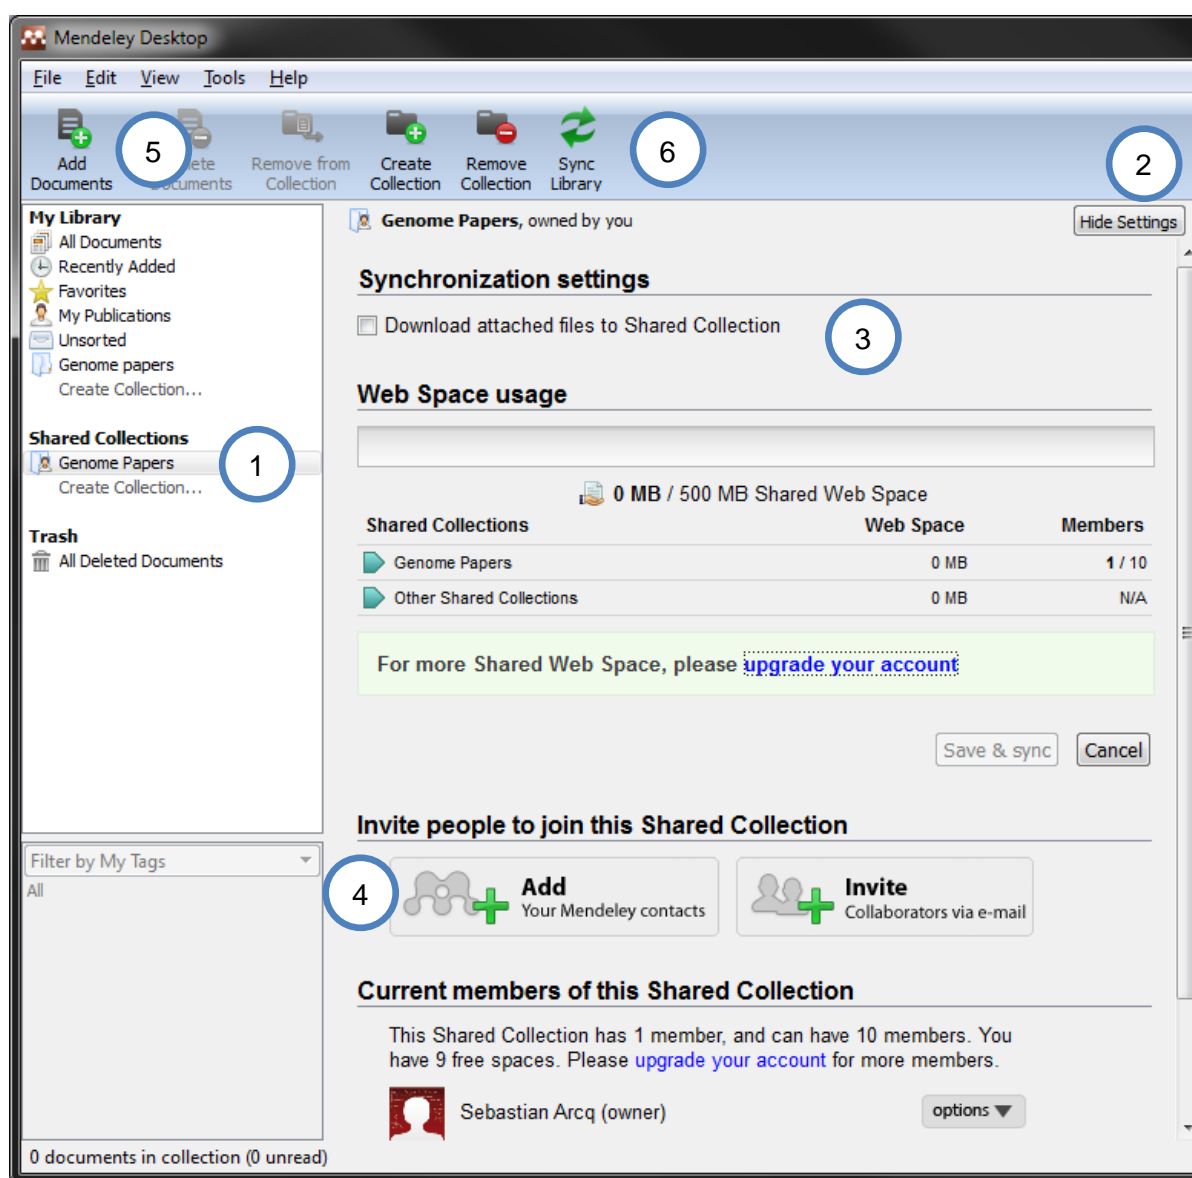

*Note: If you have subscribed to someone else's public collection and make changes to it or the document details you receive, the creator will not see your changes. In order to make changes visible to all subscribers of the collection you will need to create a Shared Collection, instead of a Public Collection.*

## Shared Collections

Shared Collections contain documents which you can share with your collaborators. This is a convenient way of tagging documents collaboratively and creating a shared literature collection between research colleagues. All documents in a Shared Collection are only visible to its members.

1. **Create Collection** and type the name
2. **Edit Settings** (next to collection name)
3. Adjust **Synchronization settings**: Choose whether or not you want to download PDF files your colleagues attach to documents in this Shared Collection.
4. **Invite Members** to the shared collection from your contacts list
5. **Add Documents** to the collection to share with members
6. **Sync Library** to apply the changes

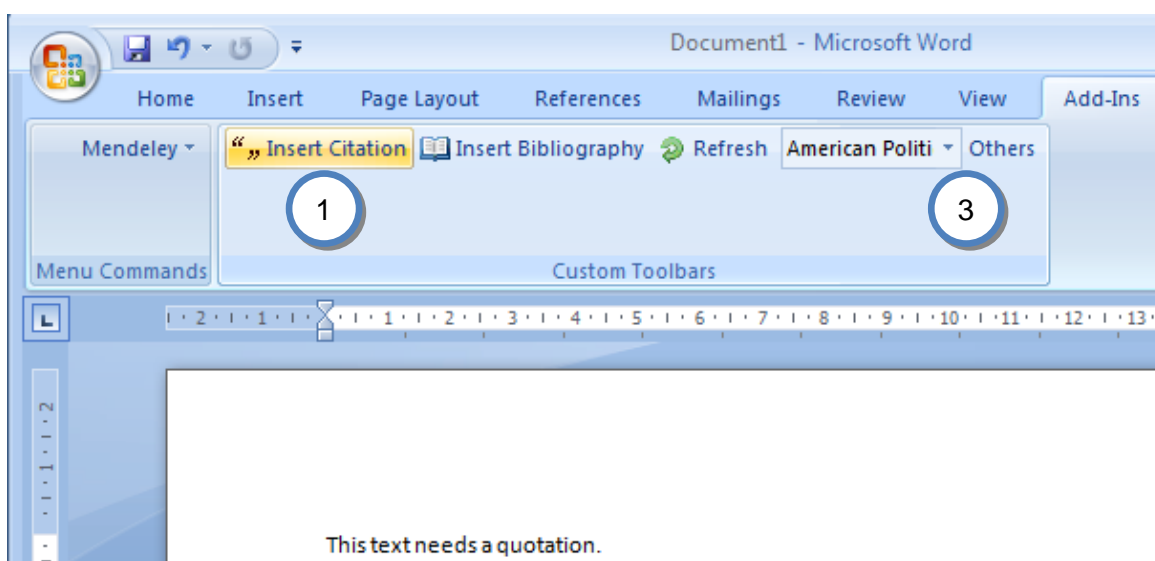

Note: In the free account you may upload up to 500 MB of PDF files to your Shared Web Space. For more web space, please upgrade your account on <http://www.mendeley.com/upgrade>.

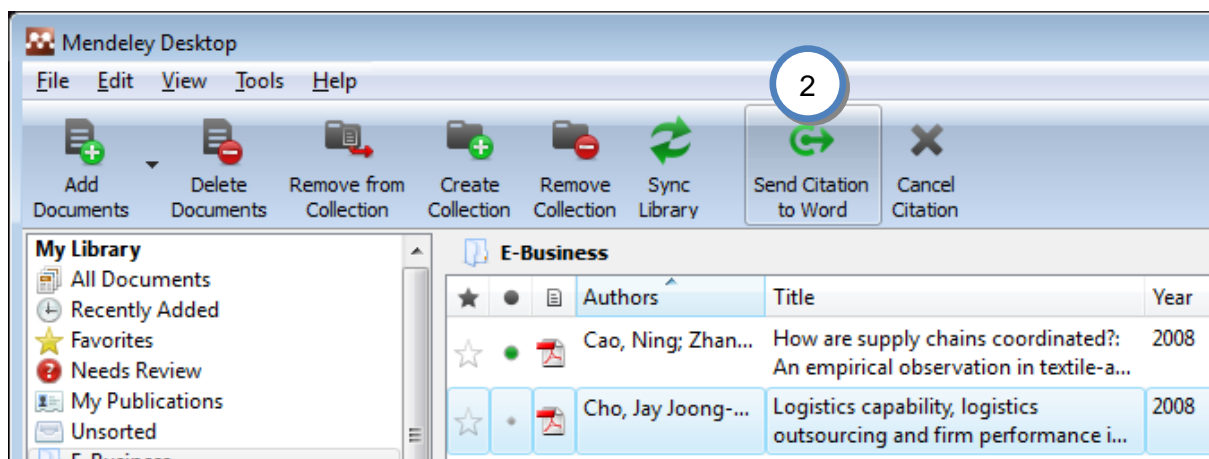

## Word and OpenOffice plug-in

Once you have your documents in Mendeley, you can cite and reference them within Word and OpenOffice with ease. The Mendeley Word & OpenOffice plug-ins integrate Mendeley into these word processors. Once installed you will have tool bar buttons that will allow you to cite a document, generate a bibliography, or manually edit any entry, saving you time and effort when you write.

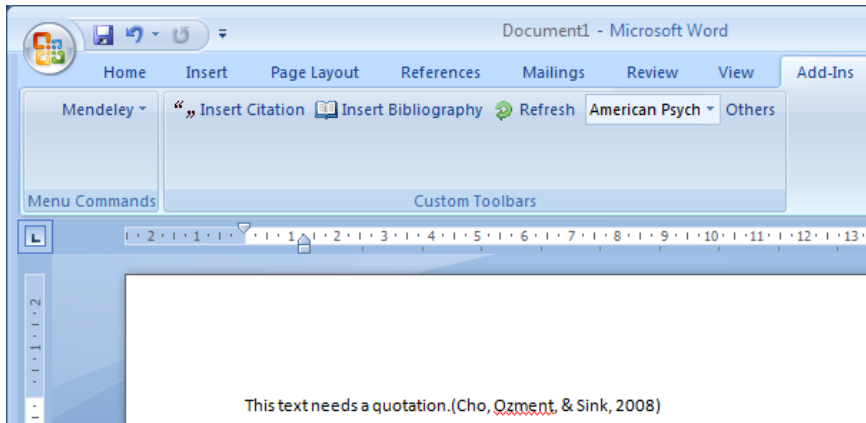

When you are creating a paper and you want to cite a document from your Mendeley Library:

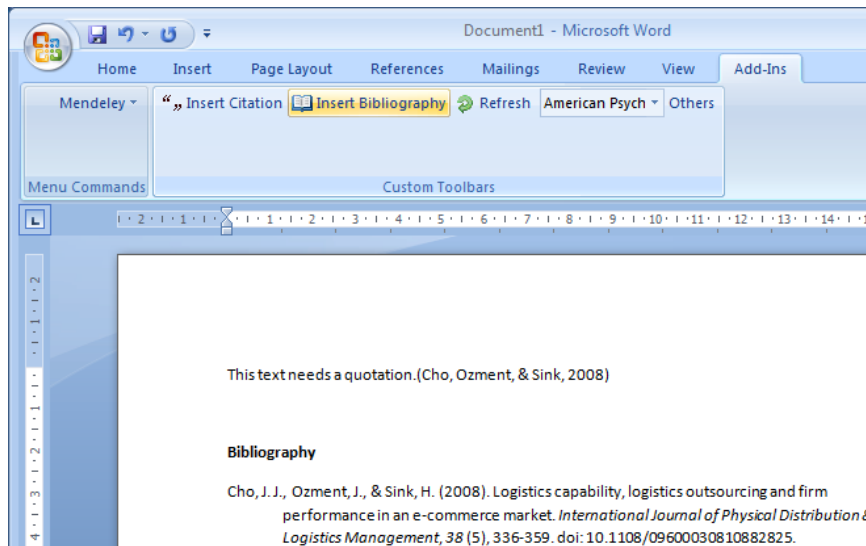

1. Click **Insert Citation** in the Mendeley tool bar within Word
2. **Select the document** in Mendeley Desktop, and click **Send Citation to Word**. You can also cite multiple documents. Just hold the Ctrl key (or the Cmd key on Mac) and left click the documents you want to cite.
3. Select the **citation style** in the drop down menu in your word processor

This will now **send the citation to Word**:

You can now generate a bibliography by clicking **“Insert Bibliography”**:

## Cite in Google documents (and other editors)

You can also add citations in other text editors, such as Google Docs. Just select the paper you want to cite in Mendeley Desktop and click:

Edit ➔ Copy Citation

Then Paste it into the document you are composing. Alternatively, you can drag & drop the paper from the Mendeley Desktop window to the document, and a reference in the current selected citation style will be added there.

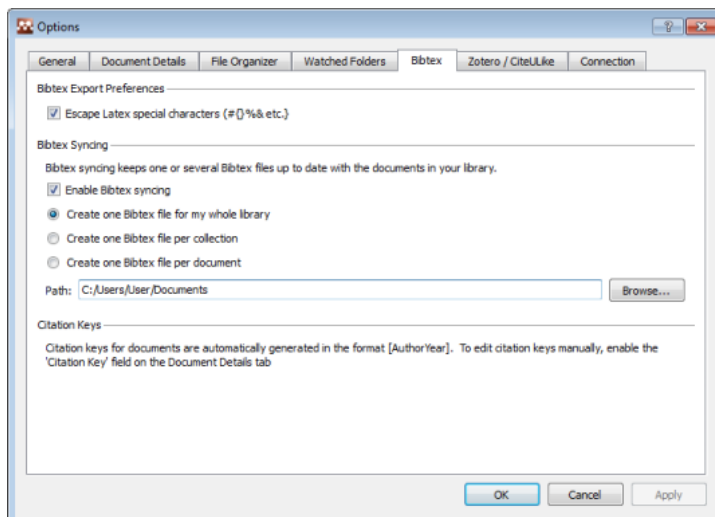

## Cite using BibTeX

You can also cite and create bibliographies in LaTeX documents. Mendeley Desktop creates a BibTeX file for your entire library, for each collection or per document. The BibTeX file(s) are updated each time you make a change to your personal library in Mendeley Desktop.

The citation keys are automatically generated in the format [AuthorYear]. You may edit citation keys manually by enabling the “Citation Key” field under Options (Document Details tab). Then you can edit citation keys under the Document Details tab in your library.

You may enable BibTeX support here:

Tools → Options → Bibtex Tab

## 4. Support

If you would like to request a feature or report a bug in Mendeley, please visit
