

Supplementary Figure 2: Common phenotypic changes for the DNA-SC35-anillin, DNA-p53-cFos, and DNA-MT-actin marker sets

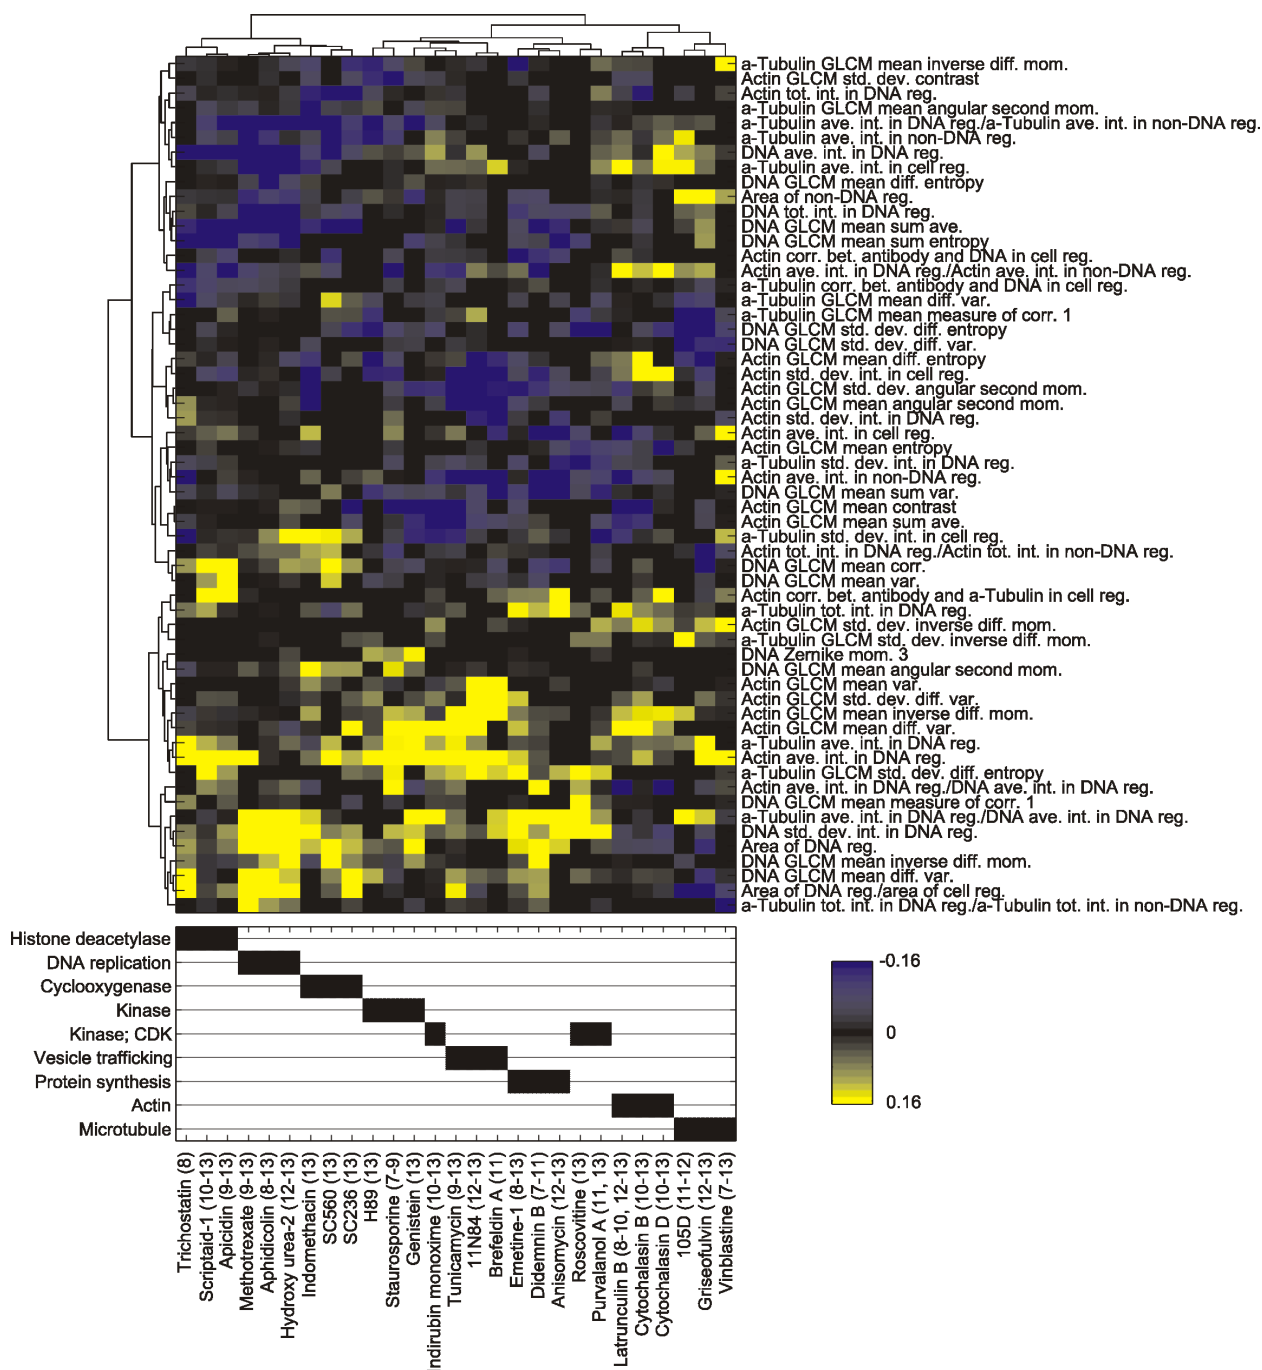

a) DNA-SC35-anillin marker set

Supplementary Figure 2 (cont.)**b) DNA-p53-cFos marker set**

Supplementary Figure 2 (cont.)

c) DNA-microtubule-actin marker set

Supplementary Figure 2 (cont.)

Supplementary Figure 2: Common phenotypic changes for the DNA-SC35-anillin, DNA-p53-cFos, and DNA-MT-actin marker sets

Small sets of informative features reveal interesting associations among different categories of compounds on the **a)** DNA-SC35-anillin, **b)** DNA-p53-cFos, and **c)** DNA-MT-actin marker sets.
