

## Table of Contents

CONTRIBUTORS TO VOLUME 414. . . . .	xi
PREFACE . . . . .	xvii
VOLUMES IN SERIES . . . . .	xxi

1. Dynamic Green Fluorescent Protein Sensors for High-Content Analysis of the Cell Cycle	SIMON STUBBS AND NICK THOMAS	1
2. High-Content Fluorescence-Based Screening for Epigenetic Modulators	ELISABETH D. MARTINEZ, ANGIE B. DULL, JOHN A. BEUTLER, AND GORDON L. HAGER	21
3. Development of Assays for Nuclear Receptor Modulators Using Fluorescently Tagged Proteins	ELISABETH D. MARTINEZ AND GORDON L. HAGER	37
4. The Ligand-Independent Translocation Assay: An Enabling Technology for Screening Orphan G Protein-Coupled Receptors by Arrestin Recruitment	ROBERT H. OAKLEY, CHRISTINE C. HUDSON, MICHAEL D. SJAASTAD, AND CARSON R. LOOMIS	50
5. High-Content Screening of Known G Protein-Coupled Receptors by Arrestin Translocation	CHRISTINE C. HUDSON, ROBERT H. OAKLEY, MICHAEL D. SJAASTAD, AND CARSON R. LOOMIS	63
6. Cell Imaging Assays for G Protein-Coupled Receptor Internalization: Application to High-Throughput Screening	SEUNGTAEK LEE, BONNIE HOWELL, AND PRIYA KUNAPULI	79
7. High-Throughput Confocal Microscopy for $\beta$ -Arrestin–Green Fluorescent Protein Translocation G Protein-Coupled Receptor Assays Using the Evotec Opera	RALPH J. GARIPPA, ANN F. HOFFMAN, GABRIELE GRADL, AND ACHIM KIRSCH	99
8. G Protein-Coupled Receptor Internalization Assays in the High-Content Screening Format	DOROTHEA HAASEN, ANDREAS SCHNAPP, MARTIN J. VALLER, AND RALF HEILKER	121

---

9. Screening for Activators of the Wingless Type/Frizzled Pathway by Automated Fluorescent Microscopy	KRISTEN M. BORCHERT, RACHELLE J. SELLS GALVIN, LAURA V. HALE, O. JOSEPH TRASK, DEBRA R. NICKISCHER, AND KEITH A. HOUCK	140
10. A Live Cell, Image-Based Approach to Understanding the Enzymology and Pharmacology of 2-Bromopalmitate and Palmitoylation	IVANA MIKIC, SONIA PLANEY, JUN ZHANG, CAROLINA CEBALLOS, TERRI SERON, BENEDIKT VON MASSENBACH, RACHAEL WATSON, SCOTT CALLAWAY, PATRICK M. McDONOUGH, JEFFREY H. PRICE, EDWARD HUNTER, AND DAVID ZACHARIAS	150
11. High-Resolution, High-Throughput Microscopy Analyses of Nuclear Receptor and Coregulator Function	VALERIA BERNO, CRUZ A. HINOJOS, LARBI AMAZIT, ADAM T. SZAFRAN, AND MICHAEL A. MANCINI	188
12. Tracking Individual Proteins in Living Cells Using Single Quantum Dot Imaging	SÉBASTIEN COURTY, CÉDRIC BOUZIGUES, CAMILLA LUCCARDINI, MARIE-VIRGINIE EHRENSPERGER, STÉPHANE BONNEAU, AND MAXIME DAHAN	211
13. Development and Application of Automatic High-Resolution Light Microscopy for Cell-Based Screens	Yael PARAN, IRENA LAVELIN, SUHA NAFFAR-ABU-AMARA, SABINA WINOGRAD-KATZ, YUVALAL LIRON, BENJAMIN GEIGER, AND ZVI KAM	228
14. Adenoviral Sensors for High-Content Cellular Analysis	JONATHAN M. KENDALL, RAY ISMAIL, AND NICK THOMAS	247

15. Cell-Based Assays Using Primary Endothelial Cells to Study Multiple Steps in Inflammation	THOMAS MAYER, BERND JAGLA, MICHAEL R. WYLER, PETER D. KELLY, NATHALIE AULNER, MATTHEW BEARD, GEOFFREY BARGER, UDO TÖBBEN, DEBORAH H. SMITH, LARS BRANDÉN, AND JAMES E. ROTHMAN	266
16. Development and Implementation of Multiplexed Cell-Based Imaging Assays	BONNIE J. HOWELL, SEUNGTAEK LEE, AND LAURA SEPP-LORENZINO	284
17. High-Throughput Screening for Modulators of Stem Cell Differentiation	PAUL J. BUSHWAY AND MARK MERCOLA	300
18. High-Content Kinetic Calcium Imaging in Drug-Sensitive and Drug-Resistant Human Breast Cancer Cells	MARIA A. DEBERNARDI AND GARY BROOKER	317
19. Measurement and Analysis of Calcium Signaling in Heterogeneous Cell Cultures	GILLIAN R. RICHARDS, ANDREW D. JACK, AMY PLATTS, AND PETER B. SIMPSON	335
20. Multiplex Analysis of Inflammatory Signaling Pathways Using a High-Content Imaging System	MALENE BERTELSEN	348
21. Generation and Characterization of a Stable MK2-EGFP Cell Line and Subsequent Development of a High-Content Imaging Assay on the Cellomics ArrayScan Platform to Screen for p38 Mitogen-Activated Protein Kinase Inhibitors	RHONDA GATES WILLIAMS, RAMANI KANDASAMY, DEBRA NICKISCHER, OSCAR J. TRASK, JR., CARMEN LAETHEM, PATRICIA A. JOHNSTON, AND PAUL A. JOHNSTON	364
22. Development and Implementation of Three Mitogen-Activated Protein Kinase (MAPK) Signaling Pathway Imaging Assays to Provide MAPK Module Selectivity Profiling for Kinase Inhibitors: MK2-EGFP Translocation, c-Jun, and ERK Activation	DEBRA NICKISCHER, CARMEN LAETHEM, OSCAR J. TRASK, JR., RHONDA GATES WILLIAMS, RAMANI KANDASAMY, PATRICIA A. JOHNSTON, AND PAUL A. JOHNSTON	389

---

23. Assay Development and Case History of a 32K-Biased Library High-Content MK2-EGFP Translocation Screen to Identify p38 Mitogen-Activated Protein Kinase Inhibitors on the ArrayScan 3.1 Imaging Platform	OSCAR J. TRASK, JR., AUDREY BAKER, RHONDA GATES WILLIAMS, DEBRA NICKISCHER, RAMANI KANDASAMY, CARMEN LAETHEM, PATRICIA A. JOHNSTON, AND PAUL A. JOHNSTON	419
24. Compound Classification Using Image-Based Cellular Phenotypes	CYNTHIA L. ADAMS, VADIM KUTSY, Y, DANIEL A. COLEMAN, GE CONG, ANNE MOON CROMPTON, KATHLEEN A. ELIAS, DONALD R. OESTREICHER, JAY K. TRAUTMAN, AND EUGENI VAISBERG	440
25. High-Content Screening: Emerging Hardware and Software Technologies	SEUNGTAEK LEE AND BONNIE J. HOWELL	468
26. An Infrastructure for High-Throughput Microscopy: Instrumentation, Informatics, and Integration	EUGENI A. VAISBERG, DAVID LENZI, RICHARD L. HANSEN, BRIGITTE H. KEON, AND JEFFREY T. FINER	484
27. Protein Translocation Assays: Key Tools for Accessing New Biological Information with High-Throughput Microscopy	ARNE HEYDORN, BETINA K. LUNDHOLT, MORTEN PRAESTEGAARD, AND LEN PAGLIARO	513
28. High-Content Screening of Functional Genomic Libraries	DANIEL R. RINES, BUU TU, LOREN MIRAGLIA, GENEVIEVE L. WELCH, JIA ZHANG, MITCHELL V. HULL, ANTHONY P. ORTH, AND SUMIT K. CHANDA	530
29. Fluorescent Protein-Based Cellular Assays Analyzed by Laser-Scanning Microplate Cytometry in 1536-Well Plate Format	DOUGLAS S. AULD, RONALD L. JOHNSON, YA-QIN ZHANG, HENRIKE VEITH, AJIT JADHAV, ADAM YASGAR, ANTON SIMEONOV, WEI ZHENG, ELISABETH D. MARTINEZ, JOHN K. WESTWICK, CHRISTOPHER P. AUSTIN, AND JAMES INGLESE	566

---

30. High-Throughput Measurements of Biochemical Responses Using the Plate::Vision Multimode 96 Minilens Array Reader	KUO-SEN HUANG, DAVID MARK, AND FRANK ULRICH GANDENBERGER	589
31. Systems Cell Biology Based on High-Content Screening	KENNETH A. GIULIANO, PATRICIA A. JOHNSTON, ALBERT GOUGH, AND D. LANSING TAYLOR	601
32. Digital Autofocus Methods for Automated Microscopy	FEIMO SHEN, LOUIS HODGSON, AND KLAUS HAHN	620
33. Fluorescence Lifetime Imaging Microscopy: Two-Dimensional Distribution Measurement of Fluorescence Lifetime	MASANOBU FUJIWARA AND WILLIAM CIESLIK	633
