

# INDEX

## A

absorbance .....15–16, 18–19,  
22–23, 25, 125, 127, 130–135, 145, 147

acoustic transfer ..... 170

activator ..... 14, 22–23, 29, 38,  
53, 123, 149

aequorin.....109–112, 117–120, 122

affinity .....8–9, 152, 154, 162

agar.....15–16, 18, 57, 59–67,  
69, 72, 73, 79, 83–84, 86–89, 90, 94, 128, 131  
dispensing.....61, 63, 79

agarose ..... 60

agonist ..... 115–117, 120–121, 152–153

American Type Culture Collection  
(ATCC)..... 105, 141

ampicillin..... 15–17, 20, 22, 60, 74

amplification.....168–169, 172

antagonist .....115, 119, 152–153

antibiotic..... 13, 16–19, 22–23,  
54, 57, 71, 74, 99

antibody.....29, 31–32, 34–38,  
140, 142–146, 148, 179  
anti-mouse..... 32, 38  
anti-rabbit..... 142, 144  
monoclonal..... 38, 179

*Arabidopsis thaliana*.....77–80, 82–83,  
85–89, 93–95

aspiration .....6, 26, 33,  
62, 64, 70, 102–103, 105, 113, 121, 142, 144, 146,  
151–152, 158, 169–171, 189

assay development .....1–6, 33, 52,  
105, 111, 120, 142–143, 156, 162, 172–173,  
177–179, 182–189

assay  
cell-based..... 1, 4, 46, 97–98,  
109, 149, 195  
cytoblot..... 141  
loss-of-function ..... 58, 71

autoclave.....15, 60–61,  
63, 83–84, 127–129

autofluorescence ..... 82

autofocus ..... 93, 195

autosampler .....151, 156–158

averaging ..... 4, 22, 25, 35, 49,  
69, 103, 131, 133, 145, 172, 207  
median..... 13, 162, 164, 194, 199, 204

## B

background signal..... 6, 23,  
36, 38, 46, 52, 58–59, 65–66, 71, 74, 87, 92, 98–99,  
104–105, 110, 115–117, 119, 121–122, 143–144,  
177, 179, 181, 183–188, 200–201, 207

bacteria .....4, 13–15, 17,  
19–23, 25–26, 59–60, 63–64, 69–70, 72–74  
culture .....13–16, 18–20,  
22, 24, 59, 62, 72, 73  
frozen stock ..... 15, 62  
pathogenic ..... 59  
physiology..... 13–14

barcode .....64, 102, 173, 189

batch processing .....6, 98, 188,  
198, 202–204

binding .....3, 8–9, 30,  
100, 104–105, 122, 140, 144, 151–152, 154,  
161–164, 167, 172

binning .....32, 35, 67,  
103, 157–158, 160–162

biosafety cabinet .....61, 64–65,  
84–86, 88, 101

bleach.....60–63, 65,  
69, 72–73, 83–85, 132

bovine serum albumin (BSA) .....99, 102,  
122, 141–142, 145, 153–154, 157, 168

## C

*Caenorhabditis elegans*.....44, 57–61, 75, 178

calcium chloride .....47, 60–61, 112–113

calcium phosphate ..... 113, 120

calcium sulfate ..... 47

calibration..... 92, 157, 163, 174, 207

carbon dioxide .....33, 101–103,  
113–114, 141, 144, 170, 185

cDNA.....2, 80, 95,  
113–115, 118, 120–121, 168–169, 172–174

cell counting .....6, 101, 155, 179

cell culture .....9, 31–33, 47,  
90, 99–102, 105, 126, 141–142, 153, 155, 168,  
170–171, 173, 184  
automated ..... 4  
microbial..... 18, 20

cell line .....31, 99–100,  
104–106, 110–111, 141, 170, 188

clonal ..... 113

- cell line (*Continued*)
- engineered ..... 4
  - stable ..... 113–114
- cell lysate ..... 60, 64, 110, 113, 115–116, 121, 142, 168–169, 171, 173–174
- cell viability ..... 97–99, 144
- CellProfiler* ..... 61–62, 68, 70–71, 74, 193, 195–209
- cells
- adherent ..... 6, 99, 101–102, 155, 168
  - animal ..... 90, 93
  - C2C12 ..... 170
  - cancer ..... 141, 146–147
  - Cos7 ..... 118–119, 122
  - endothelial ..... 29, 31, 41
  - HEK293 ..... 100, 102–106, 113–117, 120, 122
  - HUVEC ..... 29, 31, 33, 35–39
  - hybridoma ..... 179
  - mammalian ..... 4, 9, 29–30
  - plant ..... 79–80, 90, 94
  - primary ..... 4, 29, 31
  - U2OS ..... 195
  - U937 ..... 155
- centrifugation ..... 25, 33, 47, 50, 61, 64–65, 68–70, 73, 85, 101, 128, 130–132, 155, 163, 173–174
- ChemBank* ..... 2, 53
- chemical genetics ..... 2, 10–12, 14, 43, 106
- chemical genomics ..... 12, 79, 85, 88
- chemiluminescence ..... 142, 144, 146, 148
- chloramphenicol ..... 15–17, 20, 22, 110
- chromosomes ..... 77, 81, 135–136, 143, 149
- cloning ..... 8, 27, 62, 64, 66, 72–73, 82, 85, 130, 135
- compound collection ..... 1–3, 6, 10, 13–16, 19–21, 25, 43, 46–48, 50–53, 58, 60, 70, 78, 88, 106, 125, 129, 142, 144, 151, 153, 156, 168–171, 173, 177, 179–182, 184–185, 188–189
- compound concentration ..... 15, 19, 22, 26–27, 51, 54, 65, 70, 73–74, 101, 114, 115, 122, 135, 144, 154, 156, 168, 171, 173, 187–189
- compound management ..... 17, 20, 50, 98, 132, 189
- compound solubility ..... 133, 136, 184–185, 188
- compound
- active ..... 1, 8–9, 13–15, 17, 22, 27, 43, 46, 52–53, 58, 127, 133–134, 136, 143, 152, 164, 181, 187
  - lead ..... 1–3, 8, 43, 64, 72, 74, 80, 82, 139, 147, 207
  - concentration dependence ..... 13, 15, 17, 19, 22–24, 36–40, 51, 59, 65, 70, 73, 101, 105, 112, 114–115, 130, 134–136, 142–144, 155, 168, 171, 173, 183–184, 187–189
  - condensation ..... 50, 92, 94, 163
  - contamination ..... 25–26, 40, 59, 63, 72, 83–84, 133, 135–136, 174, 184, 194
  - bacterial ..... 72
  - fungus ..... 84
  - controls ..... 6–7, 15–20, 22, 24–25, 115, 118, 121, 127, 136, 144, 158, 177–179, 181–183, 196, 200–201, 209
  - compound ..... 9, 186, 190
  - gene ..... 168–169, 174
  - negative ..... 14–16, 19–20, 22, 25, 152, 156, 161, 162, 196, 200
  - plate ..... 102–104, 132–133, 136, 185, 189–190
  - positive ..... 6, 14–19, 23, 142, 144, 156, 161–162, 164, 173, 179, 183, 190, 195, 209
  - strain ..... 126, 130–134
  - vehicle ..... 6, 144–145, 191
  - well ..... 20, 22, 132–133, 144–145, 156, 161–162, 164, 172, 177–178, 181–189
- curve fitting ..... 183, 187–188, 190
- cyan-fluorescent protein (CFP) ..... 82, 91, 98–100, 102–104, 106
- cytoblot ..... 141, 143, 146
- cytoplasm ..... 31, 34, 37, 81, 99, 103–104, 195–196, 200, 209
- cytotoxicity ..... 3, 99, 104, 144
- D**
- dead volume ..... 169, 173–174
- degradation ..... 118, 139, 141, 143, 146–147, 180, 189
- denaturation ..... 128, 135
- dessication ..... 47, 50, 84
- detergent ..... 83, 142, 157
- dichroic mirror ..... 102–103, 106, 145
- dilution ..... 18, 22, 26, 32–33, 54, 65, 70, 102, 112, 114–115, 118–119, 130–132, 135, 146, 154–156, 171, 183, 185, 188
- dimethylsulfoxide (DMSO) ..... 6, 15–17, 19–20, 22–23, 25, 47, 50–51, 62, 70, 74, 102–103, 105, 129, 135, 142, 144–146, 154–156, 171, 173, 184, 188–189
- water content ..... 163
- DNA ..... 100, 128–130, 169, 178–179, 198, 201
- binding ..... 107
- replication ..... 14

staining ..... 195  
synthesis ..... 41  
carrier ..... 128, 135  
linear ..... 128  
marker ..... 113  
plasmid ..... 128, 130  
primer ..... 172  
salmon sperm ..... 128  
dose response ..... 6, 14, 17, 116,  
119, 182–189, 209  
drug ..... 2, 15, 17, 41,  
53, 88, 110, 140, 142, 195, 209  
efflux ..... 127, 134–135  
target ..... 2, 9, 58  
drug discovery ..... 1–2, 9, 41,  
43, 54, 125, 151, 175, 181  
dye  
Alexa ..... 32, 35, 37–38  
calcein-AM ..... 97–99,  
101–102, 104–106  
DAPI ..... 198  
Fluo-4 ..... 111, 122  
fluorescein/FITC ..... 98, 102,  
153–154, 161–163  
Fura Red ..... 154–156, 159–169  
Hoechst ..... 32, 34–35, 37, 100, 103  
Nile Red ..... 58, 67, 72  
rhodamine ..... 8, 148  
Texas Red/TRITC ..... 70  
dynamic range ..... 5, 29, 147, 162,  
177–179, 180, 183, 190

**E**

EC50 ..... 7, 13–14, 23,  
133, 177, 179, 182–183, 185, 187–188, 190, 209  
edge effect ..... 26, 183, 190, 192, 204  
ELISA ..... 139, 141, 143  
embryo ..... 45–46, 48, 51, 55, 69  
emission wavelength ..... 32, 34, 82, 99–100, 158  
energy transfer ..... 5, 82, 97–99, 147, 180  
*Escherichia coli* ..... 13, 15, 25, 58, 95  
ethanol ..... 17, 23, 25, 47,  
51, 60–63, 65, 72, 83, 84–85, 101, 105, 132  
ethylenediamine tetraacetic acid (EDTA) ..... 33,  
99–100, 128, 141–142, 154  
evaporation ..... 23, 26, 74, 163  
excitation wavelength ..... 82, 99–100, 106, 145  
expression ..... 31, 48,  
51–52, 78–80, 87, 93, 104, 111–114, 125–127,  
139–141, 153, 155, 163, 167–168, 170, 172–174  
constitutive ..... 100  
gene ..... 79–80,  
109–110, 143, 167–169, 171–173

inducible ..... 52, 125, 127, 130  
protein ..... 78, 125, 127,  
135–136, 142, 167  
stable ..... 111, 114, 123

**F**

false positive ..... 52, 111, 127, 136, 144, 179  
filter set ..... 61, 67, 102–103  
fixation ..... 33–34, 40, 100, 103  
flow cytometry ..... 5, 151–153,  
155, 157–159, 163–164  
fluorescence ..... 4–5, 11, 23,  
34, 36, 39, 48, 51, 57–59, 61, 65–66, 70–71, 74,  
78–80, 87, 90–93, 95, 97–105, 109–110, 145,  
151–153, 158–164, 168, 180–181, 195, 197, 205, 207  
lifetime ..... 5, 82, 93, 98  
polarization ..... 5, 98, 147, 180  
resonance energy transfer (FRET) ..... 5, 82, 97–100,  
102–104, 106, 147, 180  
time-resolved (TRF) ..... 5, 98, 147, 180  
fluorophore ..... 5, 29, 35, 37, 82,  
97–100, 151, 153, 181  
fold change ..... 120, 172  
fungi ..... 54, 72, 83–84

**G**

galactose ..... 126–127, 129–132, 135  
genetic background ..... 59, 71  
genetic construct ..... 31, 82,  
100, 111–114, 116–117, 120, 127  
genetic engineering ..... 5, 13–14, 31, 58, 109  
geneticin ..... 112, 114, 120  
genetics ..... 14, 43, 45  
forward ..... 48  
reverse ..... 82  
genome ..... 9, 14, 57–58, 77–78  
genomics ..... 2, 57–58, 77–78, 82, 85  
germination ..... 85, 93  
glucose ..... 126–129,  
131–132, 135–136, 154  
G-protein coupled receptor (GPCR) ..... 3, 5,  
30, 109–111, 113–118, 121, 151, 153  
green-fluorescent protein (GFP) ..... 10, 31,  
51, 58, 67, 79–82, 87, 104, 109–110, 198, 200–201  
growth ..... 30, 73, 90  
log-phase ..... 18–19, 24–25  
microbial ..... 15, 19  
plant ..... 85, 87  
inhibition ..... 14, 126, 136  
rate ..... 24–25, 58  
rescue ..... 136  
growth chamber ..... 86, 88, 90  
growth factor ..... 38, 41, 121, 139, 184

## H

hatching..... 54, 59, 62, 65, 69, 72  
 horseradish peroxidase (HRP)..... 142–144  
 humidity..... 17, 21, 23, 26,  
 33, 70, 74, 128–129, 131–132, 163, 170  
 hydroxyethyl-piperazine-ethanesulfonic  
 acid (HEPES)..... 112, 118, 153–154

## I

IC50..... 7, 37, 40, 146,  
 177, 179, 182, 185, 187–188, 190  
 illumination correction..... 71, 196,  
 198–199, 207–208  
 image acquisition..... 4–5, 7, 30,  
 34, 58, 66–68, 70, 73, 77, 79–80, 82, 85–86, 89–93,  
 97–103, 105–106, 147, 180–181, 197, 199, 203–208  
 automated..... 30, 66, 92, 193, 195  
 image analysis..... 59, 193,  
 195, 197, 205–206  
 imaging  
 bright-field..... 61, 66–68, 71, 73  
 fluorescence..... 87, 90, 181  
 luminescence..... 80  
 immunodetection..... 36, 139, 142–143  
 incubator..... 16–17, 21,  
 23, 25, 33, 47, 51, 61, 68, 70, 74, 90, 99, 101–102,  
 118, 129–130, 170  
 infection..... 59, 69–70, 72, 74  
 inhibition..... 13, 27, 40,  
 116–117, 121, 125–126, 130–131, 133–136, 140,  
 161–162, 177, 181, 187–188, 190  
 inhibitor..... 13–15, 19,  
 22–23, 30, 37, 39–40, 45, 117, 121, 125–127, 129,  
 131–136, 139–143, 145–147, 175, 184  
 inoculation..... 18, 23,  
 68–69, 72, 131–132  
 IPTG..... 59–60, 72

## K

kanamycin..... 15–17, 61–62, 74  
 kinase..... 3, 29–31, 33,  
 35–37, 39–40, 45, 75, 111, 139–141, 179  
 Kolmogorov-Smirnov statistic..... 194, 204

## L

larva..... 54, 59, 65–66, 69, 73  
 ligand..... 5, 99–100, 104,  
 106, 109–110, 115, 139–140, 151–153, 162  
 binding..... 99–100, 107,  
 125, 140, 152–154, 162–163  
 lipofection..... 112, 114, 118, 121  
 liquid handling..... 4, 6, 15, 20–21,  
 33, 45, 50, 61–62, 64, 156, 158, 169–174, 180, 183

automated..... 15, 20, 33, 45, 171, 174
